Listen to voices across languages and dialects

LanguageEnglish v

DialectAmerican v

Enhanced neural voiceEmma (Expressive) v

Use the sample text or enter your own text in English

hi, its time to take medicine

Adjust speed0.2x ————— 1.7x

Adjust pitch0% v

Play voice[button]

This system is for demonstration purposes only and is not intended to process Personal Data.

#### What is a Neural Voice?

By using Deep Neural Networks trained on human speech, Watson can produce natural-sounding and smooth voice quality.

[Learn more](#) about the science behind the service

#### Custom Voice Training

To distinguish your brand, work with IBM to train a voice that suits your distinct style with as little as one hour of audio.

[Learn more](#) about creating custom voices

#### Tune Neural Voices by Example

Use your own voice to adjust for misplaced pauses, awkward inflections or a general unnatural feel.
