Problem Statement

A medicine reminder app designed for people who frequently forget to take their medications. An app is built for the caretaker which enables him to set the desired time and medicine. You may also keep track of your appointments. Its parental features distinguishes it from other apps on the market, allowing you to keep track of and remotely assist your loved ones who find it difficult to utilize such an app with their remainders. The device will receive the medicine name and modify the use with voice command.

Customer problem statement:

I am Alwin of age 53 suffering from blood sugar and skin disease. I am trying to take medicine at correct time but, fails to take because of memory shortage and there is no one for me to remind me which makes me feel like Apathetic.
